CAREER OBJECTIVE

Skilled Junior MERN Developer with a year of practical experience in creating and supporting web apps using MongoDB, Express, React, and Node.js. Looking to use my abilities in a team-based development setting to produce top-notch expandable applications and make a real difference in a lively group. Eager to keep learning and getting better at coding, with a strong focus on building reliable, user-friendly solutions that boost functionality and make things easier for users.

SKILLS

Java(J2SE) ,ReactJs , JavaScript , HTML5 ,CSS ,Nodejs,Expressjs ,Troubleshooting , Git ,GitHub ,MongoDB ,MS Excel ,Linux ,Restful API.

WORK EXPERIENCE

1. Organization: H-Mustafa's A to Z Private Limited. (OCT 2024-Present)

Position: Junior Software Developer.

Job Profile:

- In ReactJS created a dynamic Item Master Module to handle the product information for the retail sector. The developed module provided features like CRUD operations, real time search and filters, responsive UI and flawless backend binding through REST APIs. Utilized React hooks , state management as well as UI libraries such as Material-UI to ease the experience of the users, that increased their effectiveness in inventory management..
- Designed and implanted automated emails functioning in the Purchase Management System over retail shopping built on the MERN Stack. APIs for the several purchase orders were programmed using Node.js/Express, and Nodemailer was adopted for sending emails to vendors as well as purchase heads.
- ReactJs has been used for a responsive UI interfacing and also for storage of purchasing data in MongoDB. Error handling was further improved, secured communication with JWT, and email workflows optimized using dynamic templates in order to improve operational efficiency.
- Implemented Service worker in react to track changes in the network and automatically sync the data.
- Built a queue-based pipeline for data processing to handle huge inflow across Redis and Bull, ensuring that bill data is processed sequentially without an overload.

2. Organization : St. Francis College for women. (Dec 2020 –May 2022)

Position: Asst IT Admin

Job Profile:

- Managed student employee data and maintained accurate records.
- Coordinated student employee assignments and performed detailed mapping.
- Prepared and submitted monthly employee check-in and check-out reports to the finance department.
- Troubleshoot software issues, ensuring efficient resolution and minimal downtime.
- Monitored and updated the college website, ensuring timely and accurate content changes.
- Updated specific web pages as required to reflect current information.
- Created new web pages and managed their deployment using FileZilla FTP client.

3. Organization: Sunera Technologies (June 2019 –Aug 2019)

Position: Contract Consultant

Job Profile:

- Communicated with customers to explain cashback offers.
- Assisted customers in resolving application-related issues.

EDUCATION

Vellore Institute of Technology , Bhopal

Jun 2020- Jul 2022

Master in Computer Application

7.3 CGPA

Avanthi Degree and PG College , Hyderabad

Jun 2017- Aug 2020

BSc Computer Science

8.1 CGPA

ACADEMIC PROJECTS

Full Stack E-Commerce Web Application with React.JS

Dec 2023

- Developed a fully functional e-commerce website.
- Utilized React for frontend development.
- Implemented Firebase for backend services.
- Designed with Material-UI and styled with Tailwind CSS.
- Integrated Razor Payment for secure online transactions.
- Delivered a modern, responsive, and scalable e-commerce platform with a focus on user experience.

- Developed a front-end web page for a gym displaying pricing and other details
- Utilized the React library, dividing the page into components.
- Transferred data between components using props.
- Implemented React Routers for seamless page navigation without refreshing.
- Integrated EmailJs for email functionality.

CERTIFICATION

- Technical Support fundamentals by Google
- Introduction to Java Programming By Udemy
- GIT & GITHUB from LinkedIn

ACHIEVEMENTS

- 5 (STAR JAVA) in Hacker-Rank.
- 50+ (Problem Solved) in Leetcode.
- Conducted AVISHAKAR-2K19 “Digital Transformation through Science” Prize Money Rs 5000
- Successfully completed 100 DaysOfCodingChallenge Conducted by VIT Bhopal

LANGUAGES

Telugu, Hindi , English , Malayalam.
